

How to Access EC2 instance (Ubuntu Instance):

1. Taking Console:

Go to **CONNECT** option → Select EC2 Instance Connect → Click **CONNECT** → New tab is open and Console is ready

2. Taking SSH:

Go to **CONNECT** option → Select SSH Client → Copy the “ssh -i ...” Command → Go to Ubuntu terminal → **Go to that path where key is stored (E.g., Downloads)** → Paste that command → Enter → Automatically you can access the shell of that machine

How to Access EC2 instance (Windows Instance):

Go to **CONNECT** option → Download the remote Desktop File → Click on Get Password → Upload the key and decrypt the password → Copy the password → Double click on RDP file and paste the password there and get the access of Windows EC2 instance
