

NICE SYSTEMS

- ① Tell me what all you know about Ansible
- ② 1 task — (config)
handler —
2 Task — (restart)
handler —
3 task — (config)
handler —
4 task — (restart)
handler —

How will above work?

- ③ What are modules?
- ④ What is host file in ansible?
- ⑤ Name & path of ansible config file?
- ⑥ What is 'raw' module in ansible?
- ⑦ How passwordless authentication login works in ansible?
- ⑧ What is passwordless authentication
- ⑨ How SSH works? What happens
- ⑩ Where ~~to~~ key copied in SSH & how users get authenticated?
- ⑪ What is docker? How it works?
- ⑫ Virtualisation v/s docker at kernel level only?
- ⑬ What is inventory file in ansible?
- ⑭ Which format is it written, name that format?

- ⑮ write a playbook for apache/httpd installation on ubuntu machine.
- ⑯ How ELB & autoscale work? what is metric & how 's it set?
- ⑰ Types & diff b/w load balancers AWS
- ⑱ Tell the real world example where autoScaling is done.
- ⑲ what is a webserver & app server? Give examples.
- ⑳ What happens if we search `www.xyz.com` explain in details start to end?
- ㉑ Have you seen CI/CD ~~pipeline~~ pipeline in real? How it works?
- ㉒ maven lifecycle & what are goals?
- ㉓ ANT v/s MAVEN
- ㉔ Does Ansible also works on windows? How?
- ㉕ Does 'ansible requires any nodes to work?

- (26) How does OS / webserver know what content to display if you browse / search 2 websites on same server?
- (27) How does DNS work?
- (28) TCP / UDP protocols?
- (29) Do you know networking commands?
- (30) If while DNS searching IP is not found in cache so ~~what~~ from where it fetches / get IP?
- (31) Tell me about 3 ways to install package on Unix m/c?
- (32) How you copy file / directory from one server to another being on 3rd server?
- (33) Any database knowledge? ~~no~~ mysql etc.
- (34) Git Questions:-
- (1) What is staging area?
 - (2) DVCS v/s CVCS
 - (3) Clone + pull diff
 - (4) What happens if you do git push?
 - (5) Why do you really require branching?
 - (6) If you are only 1 developer do you still req. branch?
 - (7) Branching commands.

⑧ How to safe/secure master branch? Can everyone push to master branch?

⑨ What does git commit command do?
